Contents

A knowledge-base for electronics soldering 1
S.M. Darwish, S. Al-Habdan, A. Al-Tamimi

The impact of the tool material and the cutting parameters on surface roughness of supermet 718 nickel superalloy 10
S.M. Darwish

Physics of plasticity 19
H.-K. Oh

Preventing welding hot cracking by welding with an intensive trailing cooler 30
X. Tian, Q. Shi

3-D FEM analysis of the temperature field and the thermal stress for plastics thermalforming 35
Y.H. Song, K.F. Zhang, Z.R. Wang, F.X. Diao

Analysis of interfacial slip in cross-wedge rolling: a numerical and phenomenological investigation 44
Y. Dong, K.A. Tagavi, M.R. Lovell

Effect of base profile of a DI beverage can and material properties on the dome reversal pressure 54
H. Utsunomiya, H. Nishimura

The effect of lubrication on mill loads during hot rolling of low carbon steel strips 61
A. Shirizly, J.G. Lenard

Dynamic characteristics of a rolling mill drive system with backlash in rolling slippage 69
Z. Wang, D. Wang

The dependence of lamellar spacing on growth rate and temperature gradient in the lead–tin eutectic alloy 74
E. Çadirli, M. Gündüz

Simultaneous stretch forming and deep drawing in axisymmetrical sheet forming 82
T.C. Lim, S. Ramakrishna, H.M. Shang

Study on wrinkling limit diagram of anisotropic sheet metals. 88
Y. Kim, Y. Son

Strain field of deep drawn knitted fabric reinforced thermoplastic composite sheets 95
T.C. Lim, S. Ramakrishna, H.M. Shang

Three-dimensional numerical simulation of the deep-drawing process using solid finite elements. 100
L.F. Menezes, C. Teodosiu

A mathematical theory of plasticity for the upsetting of compressible P/M materials 107
R. Narayanasamy, R. Ponalagusamy

A mathematical theory of plasticity for compressible powder metallurgy materials — Part II 110
R. Narayanasamy, R. Ponalagusamy

The effect of the multi-layer surface coating of carbide inserts on the cutting forces in turning operations 114
J. Wang

Diamond grinding of super-hard materials 120
A.G. Mamalis, M. Horvath, A.I. Grabchenko

Precision cutting of optical polymer components for bioengineering applications 126
A.I. Grabchenko, N.V. Verezub, S.N. Lavrynenko, M. Horvath, A.G. Mamalis

Elasto-plastic finite element simulation of rolling and compression between wedge-shaped dies. 132
M.S. Gadala, J. Wang

Shape memory properties and oxidation behaviour of a rapidly liquid quenched Cu–Sn alloy 148
M. Ceylan, R. Zengin

Elsevier Science S.A.

A study of the application of upper bound method to the CONFORM process 153
Y.H. Kim, J.R. Cho, K.S. Kim, H.S. Jeong, S.S. Yoon

Quality optimisation for laser machining under transient conditions 158
P. Di Pietro, Y.L. Yao, A. Jeromin

Study on the relationship between laser processing sound and material removal characteristics 168
T. Kurita, T. Ono, N. Morita

Mathematical modeling of the wall effect on drag forces in molding flow using optical fiber sensing data 174
Y.-L. Lo, H.-Y. Lai, M.-H. Tsai

A universal velocity field for the extrusion of non-axisymmetric rods with non-uniform velocity distribution in the extrusion direction 180
C.W. Wu, R.Q. Hsu

Optimization of the injection molding process of short glass fiber reinforced polycarbonate composites using grey relational analysis 186
S.-H. Chang, J.-R. Hwang, J.-L. Doong

Deflection of a metal strip between elements of an automatic line 194
K. Chodnikiewicz, R. Balendra

The study of ultra-precision machining and residual stress for NiP alloy with different cutting speeds and depth of cut 200
Z.-C. Lin, W.-L. Lai, H.Y. Lin, C.R. Liu
